Jerome Hipolito

Full-Stack Software Engineer · AI Agent Workflows

4+ years' experience · Remote, Philippines (UTC+8) · Available during UK business hours
+63 905 813 5728 · jeromehipolito14@gmail.com · linkedin.com/in/jeromehipolito · github.com/jeromejhipolito

PROFILE

Full-stack software engineer with 4+ years building web and e-commerce platforms in TypeScript/Node.js, Vue/Nuxt, Next.js and Laravel. Runs five Claude Code agents in parallel that take tickets from plan to code review on their own, learn from their own errors through a shared knowledge base, and ship only after review and sign-off. Built distributed systems by hand before AI tools, including Kafka microservices and payment flows, and led a team of five.

580+ tickets handled | **1,000+** merge requests | **4,340** lessons captured | **7,836** repeat errors prevented

WORK EXPERIENCE

Full-Stack Developer
Apr 2026 – Present

Fincom Technologies · MallPlus Marketplace

- Build **MallPlus**, a multi-vendor marketplace for the Philippines on **Medusa v2** and Mercur (Node.js/TypeScript), with Vue/Nuxt admin, seller centre and storefront apps.
- Designed an **AI agent workflow on Claude Code** that takes a ticket from plan to merge request: hardened acceptance criteria, phased build, tests, **Playwright** browser QA with video, and an automated review loop.
- Run **five agents in parallel**, each in its own git worktree, on one 16 GB machine and one Claude subscription; RAM, CPU and subscription usage are the only limits on adding more.
- Built a **second brain** of 7,000+ notes the agents check before acting: **4,340 lessons** captured and **7,836 repeat errors prevented** so far.
- Handled **580+ tickets** since April 2026, with **540+ done or live in production** and **1,000+ merge requests**, each reviewed by me before merge.
- Shipped returns and refunds, seller disputes, escrow, **GCash** payments, commission and payouts, keeping buyer, seller and platform balances consistent.
- Built a **NestJS** customer support ticketing system with role-based access, SLAs, escalations and masked customer data with audited reveal, connected to the marketplace by webhooks and an outbox so no concern is lost or duplicated.
- Built **n8n** automations across Jira, Google Sheets, Slack and Telegram, and introduced the AI workflow to the team, who now use it for their own work.

Senior Full-Stack Developer (Tech Lead)
Feb 2024 – Apr 2026

Betrnk Tours · Taguig City, Philippines

- Built multi-tenant microservices with **Laravel**, **Next.js**, **Apache Kafka** and **RabbitMQ**, using the Saga pattern, feature flags and idempotency for reliable distributed transactions.
- Designed relational databases and wrote unit tests with **Pest** and end-to-end tests with **Playwright** across all systems.
- Mentored and onboarded 5 developers, owned projects end to end, and ran 15+ technical interviews.

- Delivered a LINE marketing platform, a booking system, a casino cage system with live forex rates, an e-wallet API and a coupon and ads SaaS.

Junior Full-Stack Developer **Jun 2022 – Feb 2024**

Halcyon Agile · Philippines

- Built a learning management system, two e-commerce platforms and a multi-tenant SaaS with **Node.js**, **Next.js** and **Laravel**.
- Implemented the Saga pattern with idempotency on Kafka microservices across 5 services (inventory, CMS, users, payment, wallet).
- Worked in Scrum, improving delivery timelines by about 15%, and designed MySQL schemas for service-focused platforms.

OPEN-SOURCE PROJECTS

- **MerchantFlow** (331 tests): e-commerce operations with saga orchestration, a transactional outbox and webhook verification.
- **FlowBoard** (202 tests): real-time collaborative Kanban board with Socket.IO and Redis pub-sub.
- **AI Booking Agent** (139 live assertions): n8n booking agent where a Postgres constraint prevents double bookings.
- **BookIt** (130 tests): booking system with CQRS command and query handlers and real-time availability.

SKILLS

AI and automation: Parallel AI agents (Claude Code), agent memory, MCP, automated code review, n8n

Languages and frameworks: TypeScript, JavaScript, PHP, SQL, Node.js, Medusa v2, NestJS, Vue, Nuxt, React, Next.js, Laravel

Architecture and data: Microservices, Kafka, RabbitMQ, saga and outbox patterns, REST APIs, webhooks, PostgreSQL, MySQL, Redis, Docker

Quality and practice: Playwright, Pest, Vitest, GitLab CI, Agile/Scrum, mentoring, technical interviews

EDUCATION

BS Information Technology, Bulacan State University · Aug 2018 – Aug 2022
