SUMMARY

Full-stack software engineer with 4+ years in TypeScript/Node.js, Vue/Nuxt, Next.js and Laravel. Runs five Claude Code agents in parallel that take tickets from plan to code review, learn from their own errors, and ship only after review. Built Kafka microservices and payment flows by hand before AI tools; former tech lead of five.

WORK EXPERIENCE

Full-Stack Developer — **Apr 2026 – Present**
Fincom Technologies · MallPlus Marketplace

- Build **MallPlus**, a multi-vendor marketplace on **Medusa v2** (Node.js/TypeScript) and Vue/Nuxt, shipping returns, refunds, escrow, **GCash** payments, commission and payouts.
- Designed an **AI agent workflow on Claude Code** and run **five agents in parallel** on one 16 GB machine and one Claude subscription, each taking a ticket through plan, build, tests, **Playwright** browser QA and an automated review loop.
- Built a **second brain** of 7,000+ notes the agents check before acting: **4,340 lessons** captured and **7,836 repeat errors prevented** so far.
- Handled **580+ tickets** since April 2026, with **540+ done or live in production** and **1,000+ merge requests**, each reviewed by me before merge.
- Built a **NestJS** support ticketing system with role-based access, SLAs and audited access to masked customer data.

Senior Full-Stack Developer (Tech Lead) — **Feb 2024 – Apr 2026**
Betrnk Tours · Taguig City, Philippines

- Built multi-tenant microservices with **Laravel**, **Next.js**, **Apache Kafka** and **RabbitMQ**, using the Saga pattern, feature flags and idempotency for reliable distributed transactions.
- Mentored and onboarded 5 developers, owned projects end to end, and ran 15+ technical interviews.
- Delivered a LINE marketing platform, a booking system, a casino cage system with live forex rates, an e-wallet API and a coupon and ads SaaS, tested with Pest and Playwright.

Junior Full-Stack Developer — **Jun 2022 – Feb 2024**
Halcyon Agile · Philippines

- Built an LMS, two e-commerce platforms and a multi-tenant SaaS with **Node.js**, **Next.js** and **Laravel**, including Kafka microservices with sagas across 5 services.

OPEN-SOURCE PROJECTS
